

Something New During your Dental Visits at Our Office!

Visiting your dental professional is an important part of managing not only your oral health but your overall health as well.

This is why our office has invested in a new treatment method that is safe, minimally invasive, and more comfortable for patients.

This advanced system is called **Guided Biofilm Therapy**. It utilizes the modern and innovative AIRFLOW® and PIEZON® Swiss-made technologies to help remove biofilm (plaque) and calculus **in a more efficient and comfortable way**.

Dental biofilm is a colony of bacteria (generally not visible to the naked eye) that builds up on our teeth over time. Biofilm can travel throughout our bodies and **exacerbate** many **oral and overall health conditions**, such as: tooth decay, gum disease, heart disease, diabetes, respiratory illnesses, Alzheimer's, and autoimmune diseases.

Ineffective removal of the biofilm can lead to further inflammation, infection and overall disease progression.

01 ASSESS

Evaluating Your Oral Health Status

Your teeth and gums are examined to help determine the right therapy for optimal treatment and comfort.

02 DISCLOSE

Making the Bacteria (Biofilm) In Your Mouth Visible

Biofilm is nearly invisible to the naked eye. It can only be removed completely after making it visible with a disclosing solution.

03 MOTIVATE

Educate and Encourage

Based on your own risk assessment, we will discuss and demonstrate a personal home-care regimen so that you can manage biofilm at home.

04 AIRFLOW®

Remove Biofilm, Stain, and Early Calculus

EMS AIRFLOW® Max technology combines a gentle powder and warm water to comfortably remove deposits.

05 PERIOFLOW®

Removing Biofilm Below the Gums

EMS PERIOFLOW® technology removes biofilm from deep periodontal pockets gently and thoroughly.

06 PIEZON® PS

Remove Remaining Hard Deposits

Gentle removal of calculus/tartar with the PIEZON® PS No Pain technology.

07 RE-ASSESS

Final Assessment & Diagnosis

Check to determine if coloured biofilm and calculus have been completely removed; this will assist us in diagnosing cavities.

08 RE-CARE

Healthy Mouth = Healthy Body

Schedule your next Guided Biofilm Therapy appointment for the same comfortable and efficient maintenance of your overall health.
